Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 February 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of Group III and β -catenin in the paper filed 11-06-2003 is acknowledged. The traversal is on the ground(s) that there is no serious burden to examine both the bcl-2 and β -catenin target genes. This is not found persuasive because the search for each of these target genes is separate and distinct and, therefore, requires a separate search and does constitute a search burden.

Applicant has not traversed the restriction between Groups I-III

The requirement is still deemed proper and is therefore made FINAL.

Claims 1-31,37 and 46-54 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the paper filed 11-06-2003.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 32-36, and 38-45 are rejected under 35 U.S.C. 102(a) and (e) as being anticipated by Bennet et al. US Patent 6,066,500.

Claims 32-36 and 38-45 are drawn to methods wherein the expression of a target gene, including β -catenin, is inhibited using an mRNA-cDNA hybrid. Bennett et al. discloses method of inhibiting the expression of β -catenin in cells in vivo or in vitro using an oligonucleotide, including an oligonucleotide wherein the oligonucleotide is a hybrid between an RNA and an antisense DNA. The definition provided in the instant specification for an mRNA-cDNA hybrid includes molecules wherein the hybrid comprises all or a part (a part not being defined such that it excludes even as little as one nucleotide of the mRNA) of the mRNA of the target gene. Therefore, Bennett et al. anticipates claims 32-36 and 38-45.
